

Quality Policy

Overture Life's main objective is to make IVF more accessible than ever by launching a range of products which automate assisted reproduction techniques.

To achieve this goal, the company has established a quality management system in accordance with the ISO 9001:2015 and ISO 13485:2016 standards.

The Management Board understands that this goal can only be achieved through:

1
Quality policy awareness and related activities by the entire team.

2
Staff qualification and training.

3
Hard work by all.

4
Customer feedback analysis and data from the field.

5
Identification of all processes that go into building an effective quality management system.

6
Early detection of potential problems.

7
Continuous quality improvements.

8
Contributions from partners and suppliers.

Each member of our team is deeply committed to providing professional excellence. The management team takes responsibility to ensure that our quality is the cornerstone of our daily activities.

Martin Varsavsky
CEO of Overture Life
